RUTVIK SHAH

Full Stack Developer

Rbshah0029@gmail.com • (902) 989-8161 • Canada • linkedin.com/in/rbshah29

PROFILE

Full Stack Software Developer with 4+ years of experience building scalable web and cross-platform mobile applications. Experienced in designing full-stack solutions using modern technologies, developing RESTful APIs, integrating cloud services, and delivering high-quality software throughout the development lifecycle. Passionate about creating reliable, maintainable, and user-focused applications.

EXPERIENCE

Software Developer Sept 2024 – Present
Évodév Technologies Inc *Montreal, QC*

- Developed Developed and maintained full-stack web and cross-platform mobile applications using React Native, Flutter, TypeScript, Node.js, and Python, delivering scalable, maintainable, and user-focused solutions.
- Designed, developed, and integrated backend services and APIs while leveraging cloud platforms such as Google Cloud Platform (GCP) and Microsoft Azure to support secure, reliable, and scalable application deployments.
- Collaborated across the software development lifecycle to implement new features, resolve production issues, modernize legacy systems, and optimize application performance across frontend and backend components.

Software Developer Jan 2024 – Sept 2025
Cold Chain Science Enterprises *Montreal, QC*

- Maintained and enhanced a Java-based monitoring system by resolving production issues, optimizing application performance, and improving PostgreSQL database integration to increase system reliability.
- Developed a full-stack application using Python, FastAPI, SQLAlchemy, Nuxt.js, and PostgreSQL, building scalable backend services, RESTful APIs, and responsive frontend features.
- Collaborated with cross-functional teams to deliver new features, improve existing functionality, and optimize application performance while following modern software development best practices.

Associate Software Developer Feb 2021 – June 2022
Brainview Infotech PVT. LTD. *Ahmedabad, IN*

- Supported Designed, developed, and integrated customer-specific features using Python, contributing to a modular and scalable architecture that simplified feature development and system maintenance.
- Optimized PostgreSQL database schemas, queries, and data models to improve application performance and support efficient data processing.
- Developed and enhanced an event-driven Point of Sale (POS) framework with configurable payment integrations and monitoring capabilities, reducing integration effort and enabling faster troubleshooting and feature delivery.

EDUCATION

Master in Applied Computer Science 2022 – 2023
Dalhousie University *Halifax, NS*

Bachelor of Information and Technology 2017 – 2021
Saffrony Institute of Technology *India*

SKILLS

Python · TypeScript · React Native · Flutter · React.js · Node.js · FastAPI · Next.js · PostgreSQL · REST API Development · Cloud Computing (GCP & Azure) · Git & GitHub · CI/CD · Agile Development · Software Architecture
